How Extract?

Extract the file off of whatever drive it’s on (99% the I drive), onto either your C drive or W drive!!!! probably just C drive/desktop

Please

Please

Please

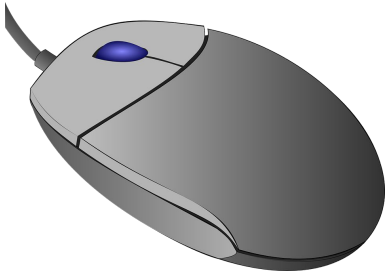

Please

Please

Please stop extracting stuff on the I drive

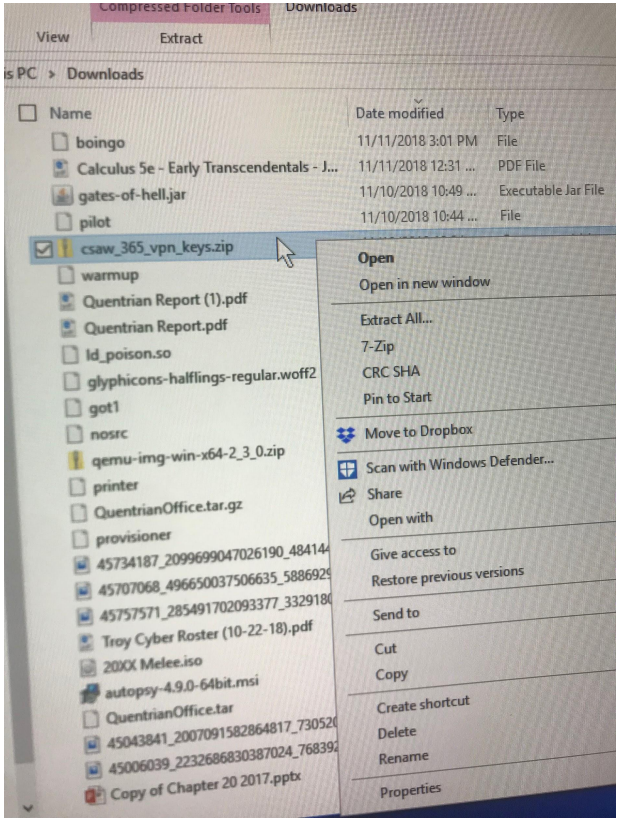

Clicking

There are right clicks and left clicks. The left click is when you click the left side of the mouse. The right click is when you click the right side.

Right click the zipped folder

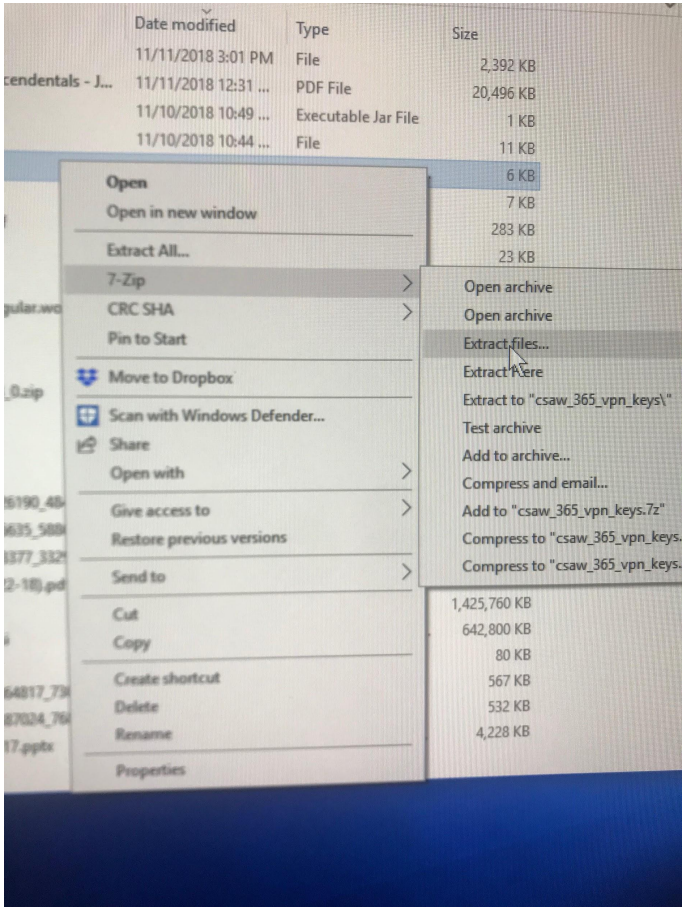

You see that box with options, that means you did something right

Move your mouse to 7-zip → extract file

You’re getting there, just follow the mouse in the picture

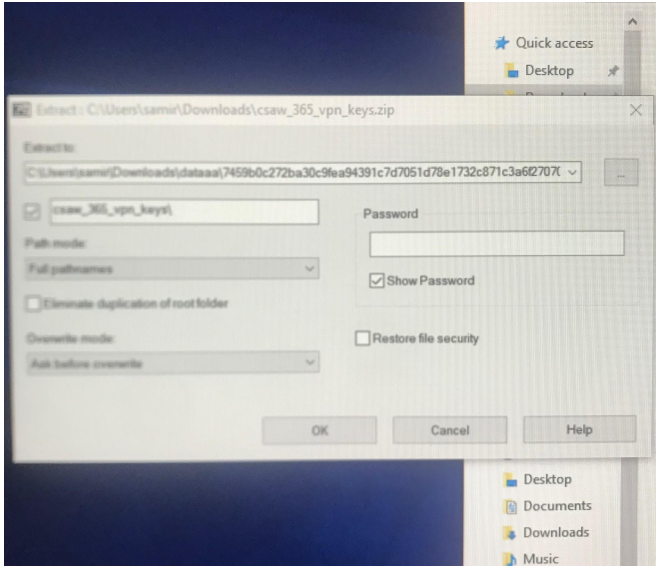

If you’re computer doesn’t have 7-Zip choose “Extract All…”

Left Click and you get a box!

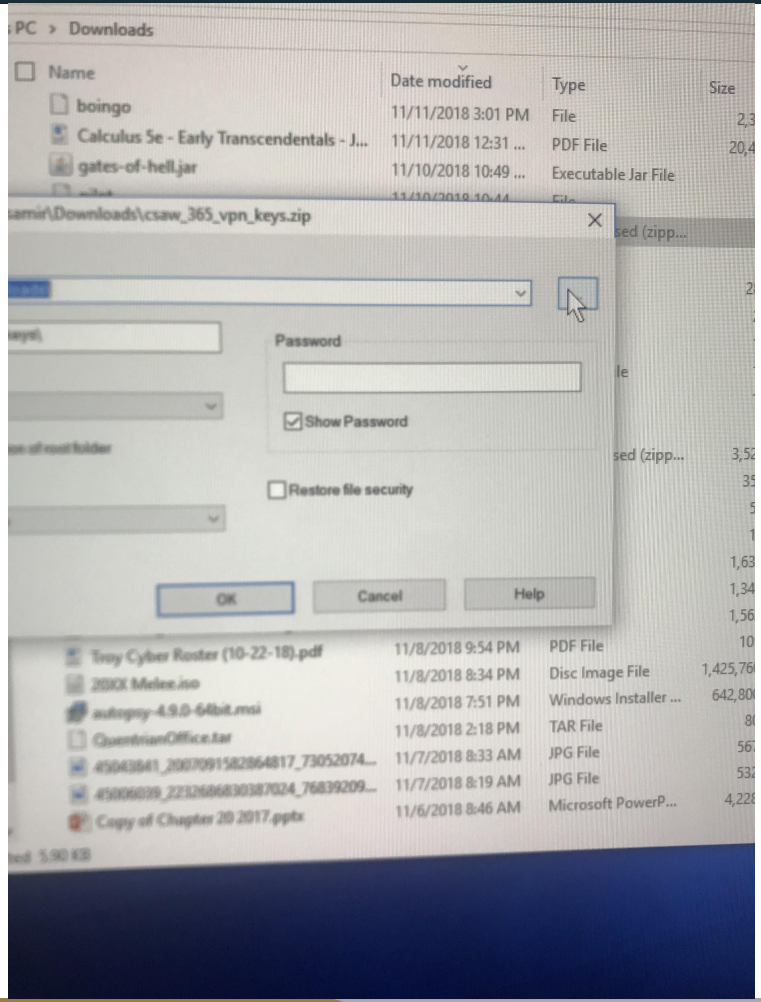

WOW COOL

*will look different if not 7-zip

Another Left Click!

Move your mouse to the left side of the box. There is a small box with 3 dots in it you want to left click

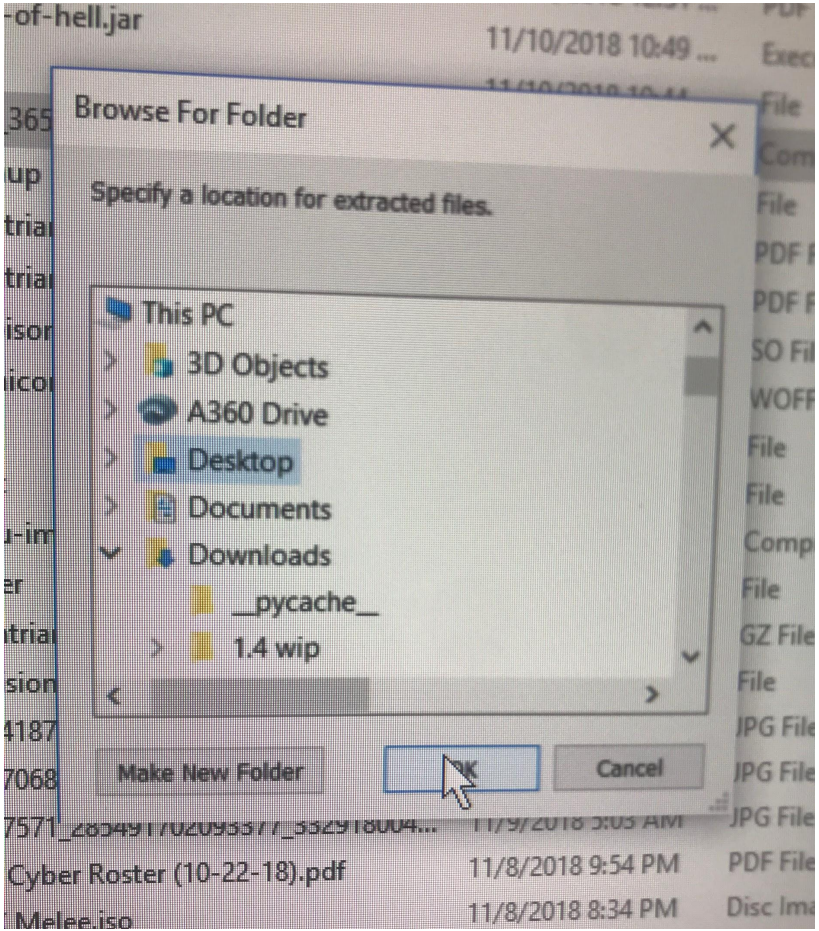

New Box!

Move your mouse to the Desktop and left click. Now you should move your mouse to the ok button as it is here and left click. You should be returned to your previous box.

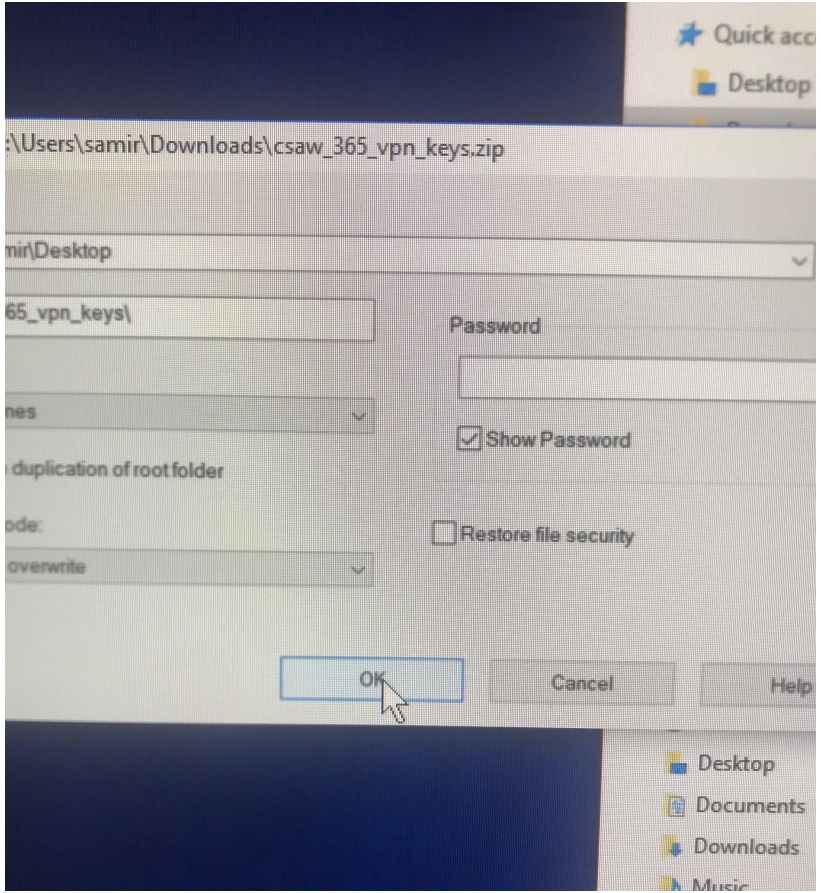

If you are in room 403 select the W: drive instead

Note no copying of the zip file is necessary

LAST CLICK!

Left click on the ok box in the bottom of the box now and you're all done!

When it’s done

Go to the location of the extraction

Not by double-clicking on the zip file!

CONGRATULATIONS!

Summary

- Right click
- Select “Extract All…” or “7-Zip -> Extract files...”
- Choose location
  - Desktop or W drive depending on room number
- Press OK
