Shares

For business and school.
Sharing is essential to any network.

How Shares Work

Main types of shares

1. Sharing with the computer's users
2. Sharing with the domain

During competition, you will almost always work with these two.

3. Sharing with FTP programs
4. Sharing over the cloud

Sharing with the computer's users

Sharing with the computer's users

- Run -> fsmgmt.msc
- Default shares
  - ADMIN$
  - C$
  - IPC$
- Unshare anything not specified by the readme and is not one of the default shares
- Add any shares if needed by right-clicking and selecting "New Share..."

Sharing with an FTP program

FTP

File Transfer Protocol

- Ex: FileZilla FTP Client
- Allows for file sharing and file transfer
- Manage who you want the certain folders or files to be shared to

Icons & Shapes

Vector Icons

Free Google Slides Templates uses Vectorial Icons from the most popular Free Sources.

Resize the Icons

All Icons are resizable. Change the icons size without losing resolution.

Edit the colors

All Icons are editable. Change the color fill and lines without affecting the shape.
