

Programs

These programs help you in securing your computer, finding files, and more. Sometimes you will be awarded for having these programs, especially antivirus programs. Others are merely tools that will assist you in finding vulnerabilities. Some programs may just simply be required to be installed on your computer.

Purpose of Programs

Time

The main goal in installing programs is to save you time. They might help you in various things, from finding files to identifying vulnerabilities.

Security

Another reason to install programs is to secure your system. These programs can be third-party firewalls, scanning software, etc.

Requirement

Sometimes READMEs will require you to install certain programs or update them.

Common Programs

On the left side are some common programs that you may want to use.

On the right side are other common programs.
