FIREFOX QUANTUM

# First off, some props to Firefox

- A lot more focus on privacy than Google Chrome
- You can disable video autoplay (hooray!)
- Third-party cookies, cryptomining blocked by default
- Fingerprinting can be blocked
- Doesn't eat all your RAM

Try it out! It's pretty neat!

# Update Firefox

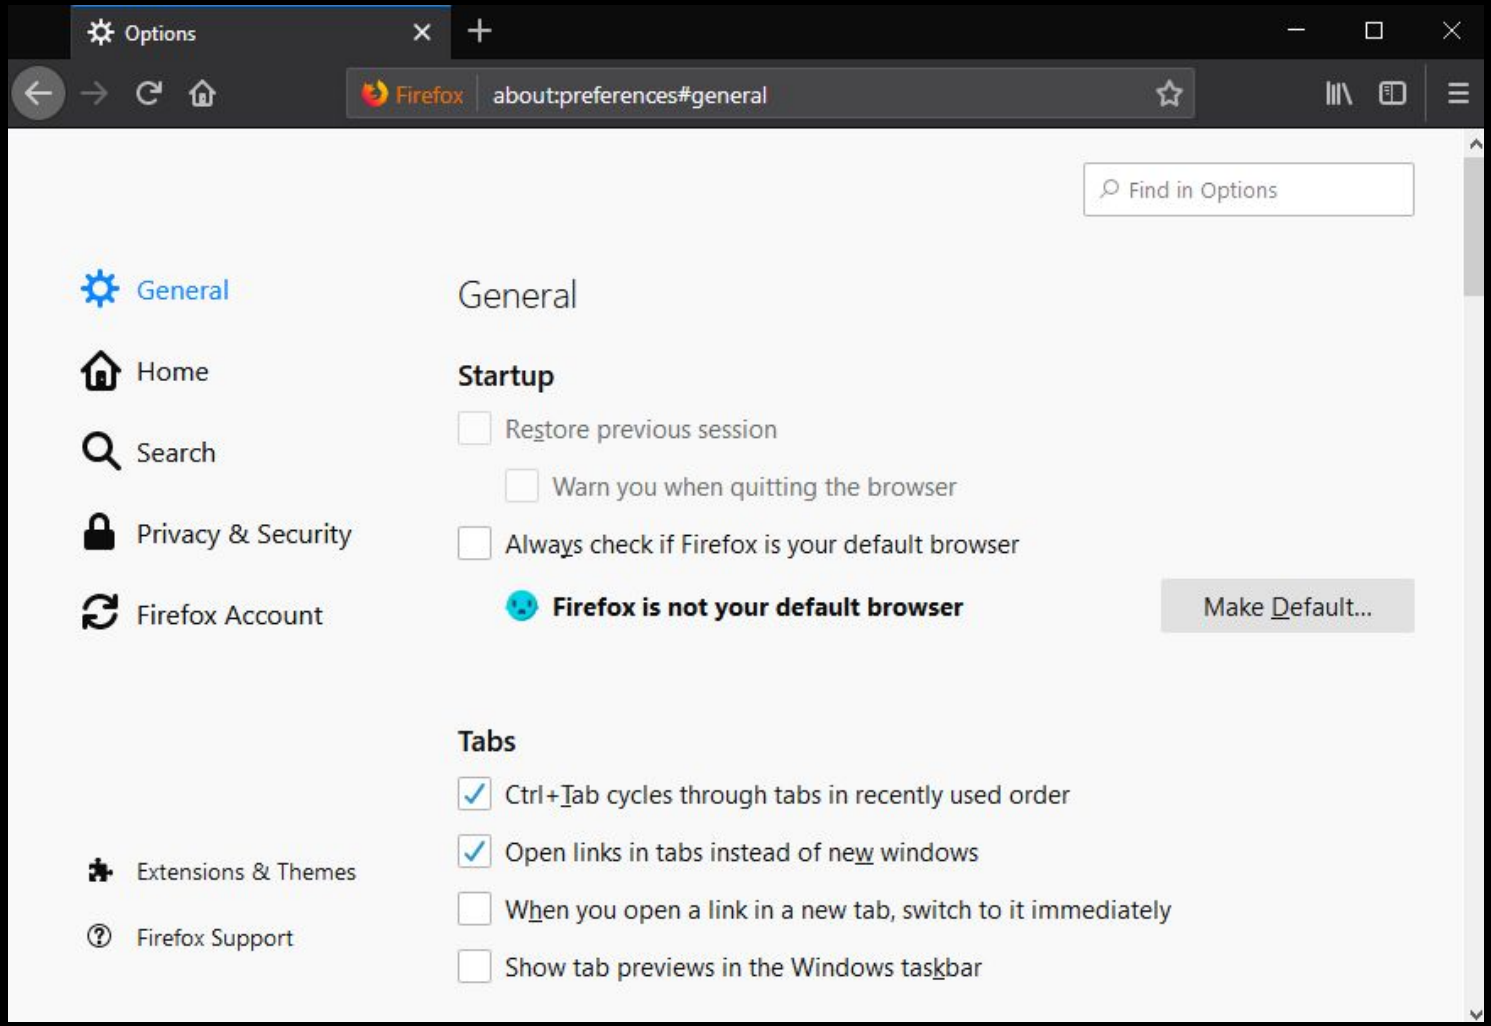

- You can simply run the installer, and Firefox will be automatically uninstalled and reinstalled for you as long as you don't have any Firefox windows open
- Alternatively, you can update through the menu icon -> Help -> About Firefox

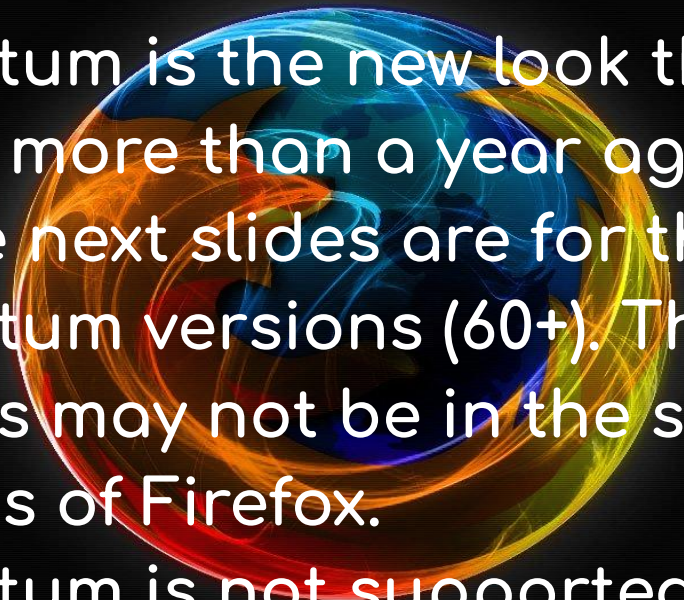

# How to get to the settings

1. Click on the 3 bars icon in the top right (menu icon)
2. Options

Options
Firefox
about:preferences#general
Find in Options
General
Home
Search
Privacy & Security
Firefox Account
Extensions & Themes
Firefox Support
General
Startup
Restore previous session
Warn you when quitting the browser
Always check if Firefox is your default browser
Firefox is not your default browser
Make Default...
Tabs
Ctrl+Tab cycles through tabs in recently used order
Open links in tabs instead of new windows
When you open a link in a new tab, switch to it immediately
Show tab previews in the Windows taskbar

# Firefox Quantum

- Firefox Quantum is the new look that Firefox got about a little more than a year ago
- Note that the next slides are for the newer, Firefox Quantum versions (60+). This means that these settings may not be in the same place in older versions of Firefox.
- Firefox Quantum is not supported for Windows 2008 and below.

# General Tab

- Set Firefox as default browser
- Allow Firefox to automatically install updates
- Set network settings

# Home Tab

- Ensure that the homepage and new tabs are not leading to malicious sites

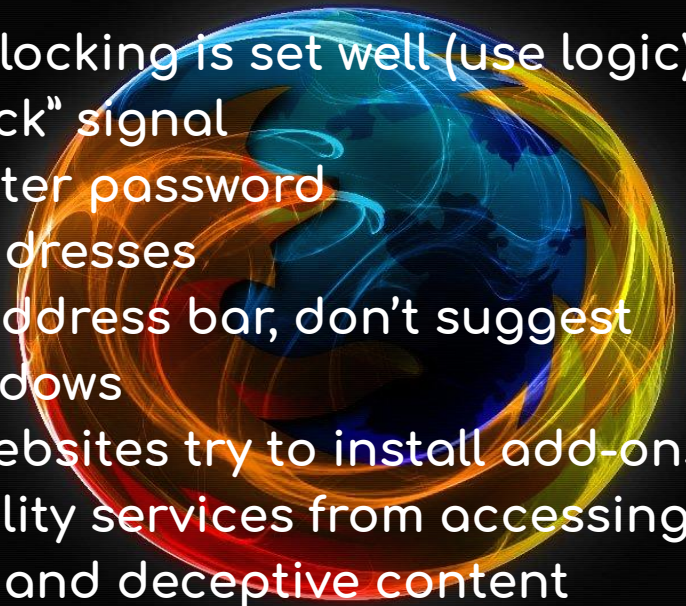

# Search Tab

- Ensure search engine is a good one
- Do not provide search suggestions

# Security Tab

- Ensure content blocking is set well (use logic)
- Send “Do Not Track” signal
- Do not use a master password
- Do not autofill addresses
- When using the address bar, don’t suggest
- Block pop-up windows
- Warn you when websites try to install add-ons
- Prevent accessibility services from accessing your browser
- Block dangerous and deceptive content
- Block dangerous downloads
- Warn you about unwanted and uncommon software

# Plugins

- To Access: Click on the 3 bars icon in the top right and then click on Add-ons
- Keep only necessary ones and update them
